## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 108-117 are objected to because of the following informalities: The numbering for claims 108-117 is incorrect because the numbering for claims 108-111 are duplicated (see claim pages 120-123). Appropriate correction is required.

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 43-54 and 73 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 43-54 and 73 lack the proper preamble necessary for a statutory computer program product claim. See MPEP 2100 for guidance on computer related inventions.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2617

4. Claims 1-33, 55-72 and 74-97 are rejected under 35 U.S.C. 102(b) as being anticipated by Green, Jr., U.S. Patent No. 5,926,133.

Regarding claims 1-33, 55-72 and 74-97, Green, Jr. discloses a system for finding a target comprising a transponder disposed on the target, a transceiver for monitoring the location of the target, a wireless communication system configured to allow communication between said transponder and said transceiver and a processor configured to find the target by virtual triangulation based on values of position information from said transponder and said transceiver (col. 5, lines 20-col. 7, line 33).

***Allowable Subject Matter***

5. Claims 34-42 and 98-107 are allowed.
6. The following is a statement of reasons for the indication of allowable subject matter: Prior art fails to suggest or render obvious the system for locating and tracking a device as claimed.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Chang et al, U.S. Patent No. 6,785,553, discloses position location of multiple transponding platforms and users using two-way ranging as a calibration reference for GPS.

Hanson, U.S. Patent No. 6,868,074, discloses a mobile data device and method of locating mobile data device.
